Eltomation receives order from Knauf Fibre for plant modernisation

Eltomation has recently obtained an order from Knauf Fibre, France for a major plant modernisation of the VE2 WWCB Plant in La Cote, France. This order contains among others the supply of the latest design Eltomation **Double Distribution Machine**. Unique to this state-of-the-art technology is the new Mixture Vertical Buffering System which will be integrated into the equipment. This new technology will contribute to a constant supply of wood-cement mixture to each of the Distribution Machines, which will contribute to a very uniform spreading of the mixture into the moulds. Engineering on this new technology has recently started. The new technology will be implemented into the plant in the summer of 2007.

Eltomation to participate at "Wood Cement Technology" Seminar in Irkutsk, Russia from March 20-22, 2007

From March 20-22nd, 2007 two seminars will be given by Eltomation in Irkutsk, Russia. Topics of the seminars are related to New Technologies in the Wood-Cement Industry. In particular attention will be paid to advanced and well-insulated building systems for the regional construction industry. One such example is the **Large WWCB Element Building System** with very high thermal insulating value (U-value of 0.19 W/m² °C) developed by Traullit, Sweden (www.traullit.se). This new building system allows fast construction of homes with full-size Wood Wool Cement Wall Elements of up to 40 cm thickness.

Eltomation to exhibit at Mosbuild Exhibition in Moscow, from April 3 – 6, 2007

Eltomation will exhibit at the upcoming **Mosbuild 2007** Exhibition in Moscow, Russia, which is to be held from 3 - 6 April 2007 at the Expo Centre. Special attention will be paid to:

- **Turn-key Production Technology** of various types of **Wood Cement Products**, such as:
 - Wood Wool Cement Board (WWCB, density of approx. 400 kg/m³)
 - EltoBoard (Wood Strand Cement Board - 1100 kg/m³)
- **Applications of Wood Cement Boards and Products**
 - Permanent shuttering systems for high-rise monolithic concrete buildings
 - Prefab Elements for various prefab housing systems
 - Industrial applications of wood-cement products for walls, floors and roofs.
